

TRADERS ENTERPRISE

Integration. Insight. Agility.

Product Overview

Traders Enterprise provides powerful tools that support the business of trading. We incorporate real-time broker, market and expense data with a suite of applications to provide the most complete picture of your firm. Whether you are the CEO, COO or Trader we've created a comprehensive view of your business that eliminates time-consuming tasks, maintains the integrity of your data, and brings much needed transparency to a complicated process.

DATA MANAGEMENT:

TE offers a real-time window into investment activity across all asset classes that is instantly accessible regardless of location. Drill down into the data around individual assets or activities when necessary to levels of granularity that support risk management and effective decision-making. Strict governance applies enterprise-wide processes and standards to support data auditability.

REPORTING AND INSIGHTS:

Transform your firm's data into actionable insights, fast. Analyze your traders' performance in real-time and historically. Dashboards provide insights into assets classes, currencies, and collateral allocation to support sophisticated risk management. Track expenses, P&L, Contribution Summaries, and much more.

OPERATIONAL EXCELLENCE:

TE provides your firm with the visibility it needs to manage and apply management fees, vendor fees, and other charges. Take control of your operations through our automation engine. Provide your trading talent with dashboards and individual reports to support transparency.

TRADER'S ENTERPRISE IS A RAPIDLY EXPANDING, HIGHLY SCALABLE PLATFORM THAT AMPLIFIES YOUR ENTIRE FIRM.

Service

Trader's Enterprise values customer satisfaction above all else and that comes from a service ethos that values partnership, responsiveness, and know-how. From the outset, we work with you to ensure a seamless migration of your firm to the TE platform, identifying your priorities and unique needs. We have invested in a best-in-class support infrastructure that means you will always have responsive, intelligent support personnel who understand the demands of your time and the importance of your data to your firm's success.

Security

With Trader's Enterprise, your firm's data becomes a valuable, strategic asset, and we treat it as such by securing it with today's leading technologies and practices. We employ a defense in depth approach to data security, leveraging all that the cloud has to offer, and we integrate best practices and technologies in application security to ensure that you maintain the control and integrity of your most valuable commodity.
